Testovex

ENTERPRISE TEST AUTOMATION, BUILT FOR ACOE TEAMS

Author. Run. Fix. Release.

Cut test maintenance. Raise quality. Ship faster.

No-code test automation with agents that draft your tests, explain every failure, prepare the fix and call the release. You approve.

Lower cost
Fewer hours lost to test upkeep.

Higher quality
More coverage. Results you can trust.

Higher productivity
Tests in minutes. No manual status.

SOUND FAMILIAR?

The problems every QA team knows

Tests break every sprint
One UI change turns dozens red.

Two tools, two suites
Web and API tested separately.

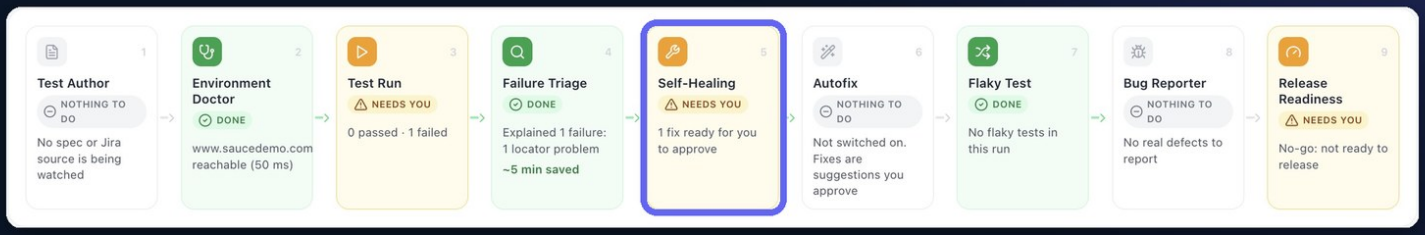

Failures with no cause
Hours lost digging through logs.

Releases on gut feel
No clear go or no-go.

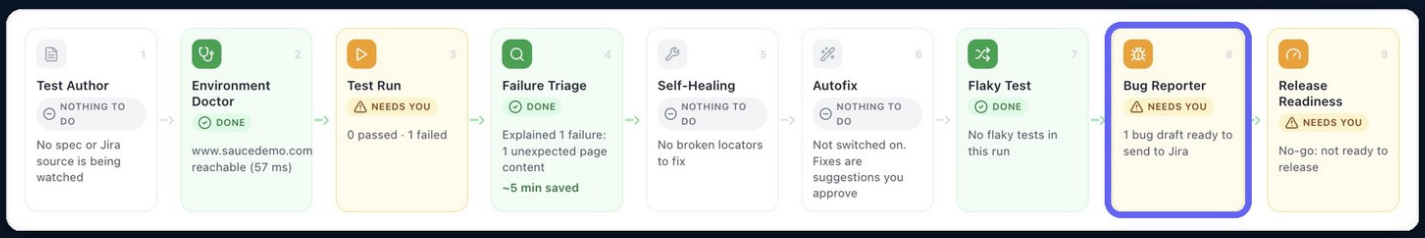

Testovex

Three problems.
Three agents. One inbox.

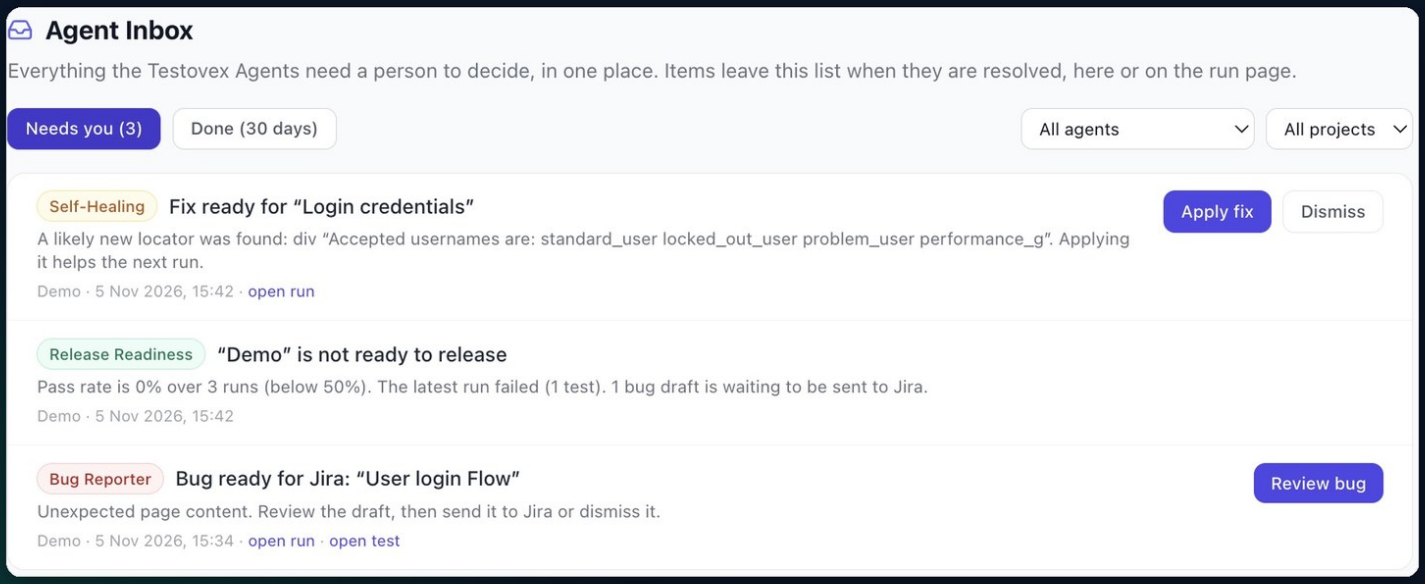

CASE 1 Locator broke Self-Healing has the fix ready

CASE 2 Real defect found Bug Reporter drafts the Jira bug

ONE INBOX Everything that needs you lands here

You approve.

Agents do the repetitive work. You make the decisions.

THE BUSINESS IMPACT

What it means for your business

Lower cost

- Fixes proposed, not hand-made
- Fix a component once, everywhere
- Causes named in minutes

Higher quality

- Tests drafted from Jira and specs
- Web and API in one test
- Release verdict with evidence

Higher productivity

- Tests generated in minutes
- Jira bugs drafted for you
- Live dashboards, no status reports

BEFORE AND AFTER

Activity	Today	With Testovex
Fixing broken tests	Hours every sprint	**Fix proposed and verified**
Why did it fail?	Digging through logs	**Cause named on every failure**
Logging a bug	Copying evidence to Jira	**Drafted, one-click approval**
Ready to ship?	Gut feel	**Ready, at risk or not ready**

A SIMPLE WAY TO SIZE IT

1.5
engineers of time on upkeep
(5 engineers × 30%)

0.5
engineer back every month
if that is cut by a third

Illustrative, not a guarantee. Try the ROI calculator at testovex.com/pricing.

WHY TESTOVEX

Everything from first test to release call

Test Author	Run	Failure Triage	Self-Healing	Bug Reporter	Release Readiness
drafts tests	every change	explains why	fixes tests	drafts Jira bugs	go / no-go

Agents, end to end

Draft to release call. You approve.

Web + API, one test

No second suite to maintain.

Org library

Build once, reuse in every project.

Leadership dashboards

Live by org, project and release.

Tests in minutes

Record, or draft from Jira and specs.

Test data built in

CSV, Excel, JSON and generators.

CI ready

CLI and pipelines, three browsers.

Secure by design

Isolated orgs, locked credentials.

All of this is live today, in beta.
